

Seepage and Conveyance Technical Feedback Group

San Luis Canal Company 11704 Henry Miller Avenue, Dos Palos April 26, 2012

Preliminary draft – subject to change

- Purpose:
 - Revise the SCTFG charter
 - Solicit input on peer review of the SMP;
 - Updates on Agreements and current projects

- Outcomes:
 - List of SCTFG charter revised objectives
 - List of peer reviewers
 - Questions for peer reviewers

- SCTFG Charter
- Seepage Management Plan Peer Review
 - Panel
 - Objectives
- SPH Agreements Section
- Current Projects
- Next Steps

Brian Heywood

SCTFG CHARTER

Purpose:

Brainstorm any needed revisions to SCTFG charter

- Revision #3, March 22, 2011
- Scheduled for Sept. 2011 revision

• Project Purpose:

"Provide a constructive forum [for] information exchange ... among parties ... regarding ... flows and seepage."

• Benefits

"Improved anticipation, resolution, and avoidance of issues and impacts associated with ... flows."

- Current Objectives/Focus
 - "Convey Interim and Restoration Flows while avoiding seepage impacts"
 - "Identify locations for projects with potential for seepage impacts"
 - "Identify potential projects that would avoid seepage impacts"
 - "Set evaluation criteria for projects"
 - "Develop a common understanding of the process, procedures and expectations for projects"
- New objectives?

• Communications

"The meeting participants will maintain responsibility for bringing forward issues and ideas from their constituentsand informingconstituents of the information...."

- Participants
 - Agencies (Reclamation, DWR, CVFPB)
 - Water Districts
 - Landowners
 - Restoration Administrator
 - Settling Parties

• Core Topics?

• Deliverables and milestones?

Katrina Harrison

SEEPAGE MANAGEMENT PLAN

Purpose: Solicit input on questions for peer review panel (via short SMP review)

- Reclamation currently reviewing document
 - Consistency
 - Completeness
- Peer review of SMP
 - Confirmation of process
 - Guidance on more accurate methods
 - Transparency

Peer Review Process

- Develop objectives, questions by May 11
- Peer Review Kickoff presentations week of July 2
- Panel conducts review; prepares report by Aug. 24
- Peer Review findings presentation week of Aug. 27
- SCTFG review report; discuss findings by Sept. 21
- Reclamation revises SMP as appropriate by Nov. 2

All dates are tentative

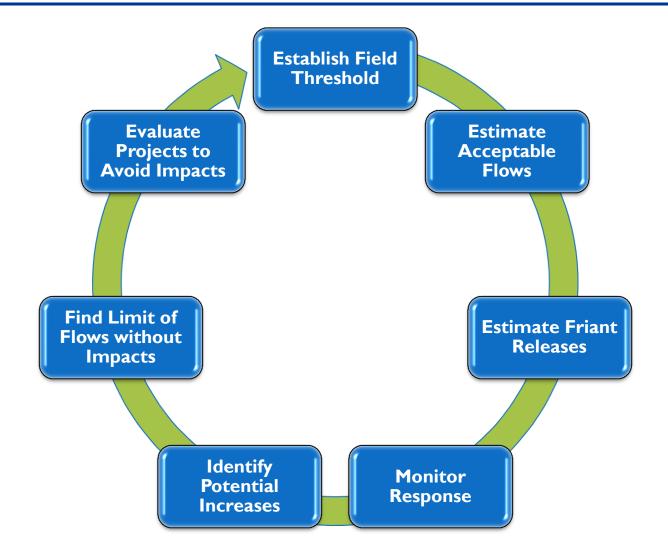

• "The objective of the Seepage Management Plan (SMP) Peer Review is to provide Reclamation with confirmation of the processes described in the SMP and, where appropriate, guidance on revisions to the document to increase the document's technical accuracy."

• Comments or suggestions on objective?

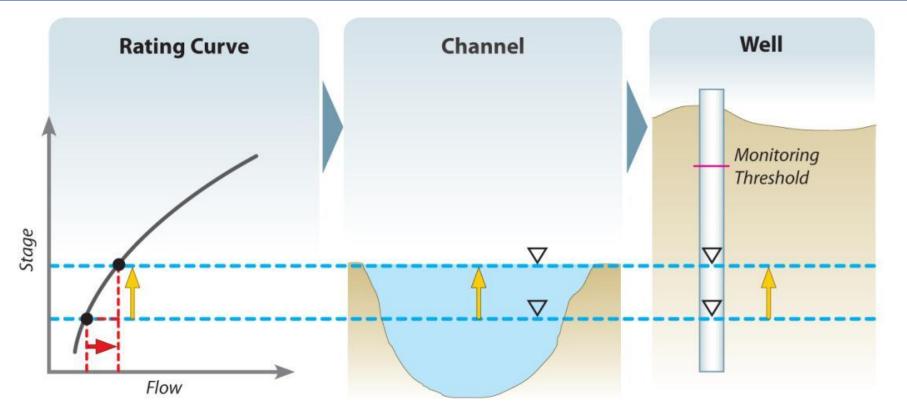

Iterative Approach to Increase Flows while Avoiding Impacts

Seepage Management Plan Conceptual Model

 Thresholds identify potential problems so that Reclamation can establish operating criteria to manage flows

- Seepage Effects
- Areas Potentially Vulnerable to Seepage Effects
- Historic Groundwater and Surface Water Flow
- Sediment Texture and Other Data
- Operations
- Monitoring
- Groundwater and Soil Salinity Thresholds
- Landowner Claims Process
- Modeling

Questions for the Panel

• Switch to PDF File

• Comments? Suggestions?

SMP Peer Review
Objectives The objective of the Seepage Management Plan (SMP) Peer Review is to provide Reclamation with confirmation of the processes described in the SMP and, where appropriate, guidance on revisions to the document to invesse the document's the technical accuracy.
Note: All questions listed below are intended to address the direct concern for seepage from the San Joaquin River (SIR) and its impact to adjacent lands as part of the San Joaquin River Restoration Program (SIRRP).
General/Overarching Are the SMP and the analysis processes described in the document transparent? Does the SMP adequates response mechanism? Solution in the subject of t
Appendix A: Seepage Effects . is the list of potential adverse effects of seepage comprehensive and accurate? Are there others effects or data agos that not are presented?
Appendix B: Areas Potentially Vulnerable to Seepage Effects 8. Are the methods for assessing groundwater levels sufficient to define areas of potential seepage? Are there any important data gaps for future analysis?
Preliminary Draft – Subject to Change Page 1 of 3

Peer Review Candidate Criteria

- Technical expertise
 - Groundwater
 - Soils and salinity
 - Agronomy
- Unbiased
 - Not involved in development of SMP
 - Not an advocate?
- Local knowledge
 - Experience in the Central Valley
- Other suggestions on criteria?

- Al Blair, Ph.D, P.E. Consultant
- Charles M. Burt, Ph.D., P.E., CID Cal Poly ITRC
- Steven Deverel, Ph.D., HydroFocus
- Thomas Harter, Ph.D. UC Davis
- Jack Keller, Ph.D., Keller–Bliesner Engineering
- Joel Kimmelshue, Ph.D. NewFields
- Albert Steele, P.G., C.H. Consultant

Al Blair, Ph.D., P.E.

- 33 years of experience
- M.S. and B.S., Agricultural Engineering
- Design, contract, and litigation support to irrigation and water districts in TX, NM, AZ, and CA
- Expertise includes groundwater modeling, aquifer tests, and groundwater and surface water rights
- Local groundwater model experience in San Joaquin Valley

- Ph.D., Engineering, M.S., Irrigation and Drainage Engineering, B.S., Soil Science
- Author or co-author of 120 articles and study guides, related to on-farm irrigation, canal modernization, and efficiency
- First chairman of the IA Certification Board.
- Extensive field and design experience in drip, sprinkler, and surface irrigation
- Expert testimony for Settlement

- Ph.D., Soil and Water Science, M.S. Soil-Plant-Water Relations, B.S. Agricultural Science and Management
- 27 years of experience
- Analyzes groundwater systems, chemical and physical soil processes, water quality
- Author of over 30 publications on vadose-zone hydrology, biogeochemistry, subsidence, groundwater geochemistry, quality, hydrology
- Expert testimony for Settlement

Thomas Harter, Ph.D.

- I6 years of experience
- Ph.D. Hydrology (emphasis subsurface hydrology); M.S. and B.S., Hydrology
- UC Davis, Dept. of Land, Air, and Water Resources
- Dr. Harter's research group has done extensive modeling, laboratory, and field work to evaluate the impacts of agriculture and human activity on groundwater flow and contaminant transport in complex aquifer and soil systems.

- Ph.D., Ag & Irrigation Eng'g, M.S. Irrig. Eng'g, B.S. Civil Eng'g
- Nationally and internationally recognized expert in the design, implementation, and management of irrigation systems
- Author of more than 90 technical papers, 50 major consulting reports, 9 handbooks and 2 textbooks (agricultural water resources planning and engineering, on-farm water management, and irrigation system design)

Joel Kimmelshue, Ph.D., CPSS

- 14 years of experience
- Ph.D. in Soil Science, water resources concentration
- development and management of agriculturalbased soil/water/plant systems
- land reclamation, soil/plant nutrient dynamics and management, irrigation and drainage in arid and humid climates, soil classification, crop production.

Albert Steele, P.G., C.H.

- 35 years of experience
- M.S. and B.S., Geology
- Specializing in groundwater monitoring and banking projects
- He served on the advisory group for the SJRRP, performing technical review of proposed groundwater monitoring networks
- Designed monitoring well networks, developed monitoring protocols across San Joaquin Valley

- Other suggestions?
 - Names?
 - Experience?

Katrina Harrison

SEEPAGE PROJECT HANDBOOK

Elements of the Seepage Project Handbook

- Introduction
- Site Evaluation
- Plan Formulation
- Environmental Compliance
- Data Collection
- Design
- Construction
- Agreements (Financial Assistance) Today

Multiple to allow flexibility:

- Financial Assistance with districts for multiple projects (or interested landowners)
- Memorandum of Understanding with operators for operations and maintenance
- Agreement with landowner, operator, and Reclamation for each specific project

- Types of Financial Assistance Agreements:
 - Grants
 - Cooperative Agreements

- I. Develop Scope of Work
 - Requirements of work to be accomplished
- 2. Advertisement
 - grants.gov
 - Catalog of Federal Domestic Assistance

- 3. Recipient Submittal
 - grants.gov lists requirements
 - SF-424, at minimum
- 4. Selection
 - All meeting minimum criteria are evaluated by committee
 - Selection is made per the selection criteria identified in the announcement

- 5. Reporting
 - Federal Financial Report, Form SF-425 (quarterly)
 - Request for Advance or Reimbursement, Form SF-270 (quarterly)
 - Progress Reports (quarterly)
 - Final Report, 90 days after completion of grant

Basic Roles and Responsibilities

- Reclamation
 - Develop and oversee the financial assistance in coordination with landowners
 - Develop and oversee site-specific agreements in coordination with landowners
 - Conduct periodic quality checks of the financial assistance recipient's work,
 - Collect required reports from the recipient, and
 - Develop a Memorandum of Understanding for operations and maintenance

Basic Roles and Responsibilities

- Landowner
 - Providing access to the seepage
 - Signing agreements with Reclamation and/or the water district to allow for financial assistance and O&M,
 - Following the terms of the financial assistance and site-specific agreements,
 - Developing and signing a Memorandum of Understanding for operations and maintenance, and

Basic Roles and Responsibilities

- Water District or operator
 - O&M of the seepage project
 - Collecting the necessary monitoring data
 - Developing, signing and following terms of financial assistance and site-specific agreements with Reclamation and/or the landowner
 - Developing and signing a Memorandum of Understanding for operations and maintenance,
 - Submitting the required receipts and reports to Reclamation.

Mandatory Terms

- Appendix A to 2 CFR 25 Registration
 - The grant recipient will need to have a current DUNS number and Central Contractor Registration
- Appendix to 2 CFR 35 Recipient Integrity
 - If the grant recipient currently has active federal grants, contracts, etc. over \$10 million, the recipient will be required to provide information pertaining to criminal convictions, civil proceedings resulting in fines, or administrative proceedings resulting in a fine

Mandatory Terms

- Appendix A to 2 CFR 170 Subaward Reporting
 - The grant recipient must report each action that obligates \$25,000 or more in Federal funds
- Civil Rights, Discrimination
 - Recipients must comply with the Civil Rights Act, I4th amendment, Rehabilitation Act of 1973, Age Discrimination Act of 1975, and similar antidiscrimination statues

Mandatory Terms

- OMB Circular A-133 Audits
 - Recipients that expend \$500,000 or more a year in federal funds must have an independent audit
- Assurances
 - Standard assurances according to SF-424B (nonconstruction) or SF 424D (construction) will be included.
- 2 CFR 230 (A-122) Cost Principles
 - Portions of 2 CFR 230 (A-122) may also need to be followed to determine which costs are allowed or disallowed

Agreement Terms

- Final design and construction
- Environmental compliance and permitting
- Operations and maintenance of physical project
- Long-term monitoring (adjacent groundwater, physical project performance, and project discharge amount and water quality)
- Cost-share: Cost of increased functionality/capacity of seepage project

- Reclamation reviews 60% and 90% design, plans, drawings, specifications and cost estimates
- 3 weeks to review
- Reclamation shall retain the authority to approve the final design
- 2 weeks to review and approve the 100% design before construction may proceed

- Pumping only during Interim or Restoration
 Flows over 350 cfs unless otherwise agreed
- Water discharged to the river or a district or landowner canal during this period, as agreed to by Reclamation, the district, and the landowner in an agreement for each project
- No reimbursement for pumping during flood flows

Restoration Flows

CURRENT SEEPAGE PROJECTS

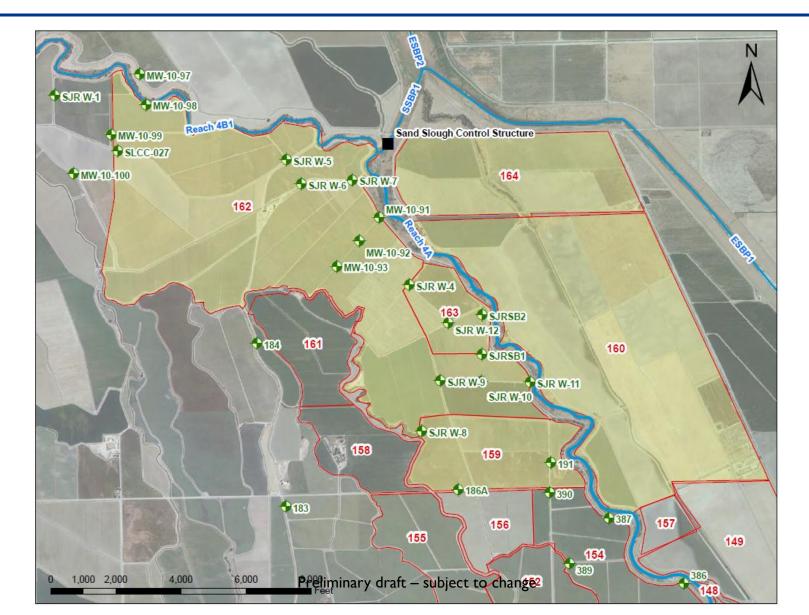

Reach 3 / 4A Landowner Meeting

- March 1, 2012 in Los Banos
 - Invited Reach 3/4A landowners with "priority" parcels
 - Provided update on SMP, SPH
 - Scheduled site visits

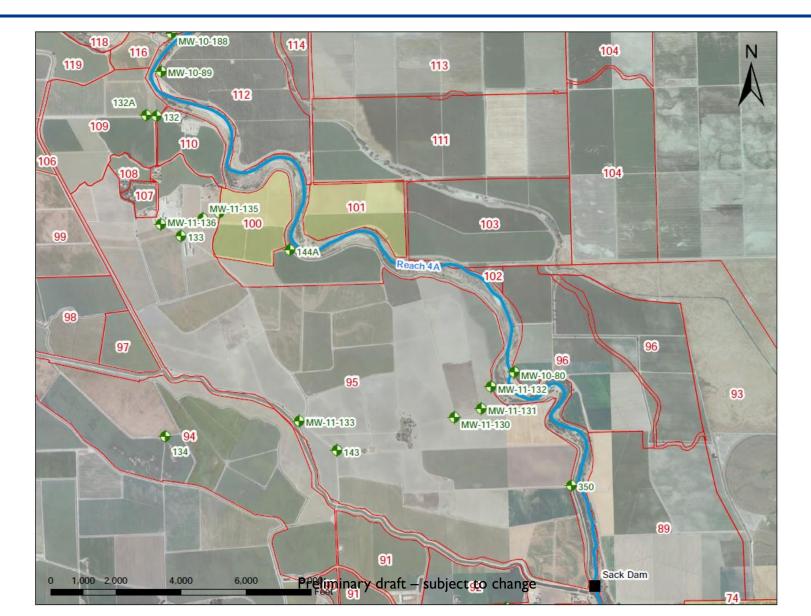

- Highest priority locations to resolve potential impacts and increase river flows
- Criteria
 - Observed 2011 seepage, and/or
 - District manager observed historical seepage, and/or
 - Shallow nearby groundwater level above 4 feet, unaffected by irrigation

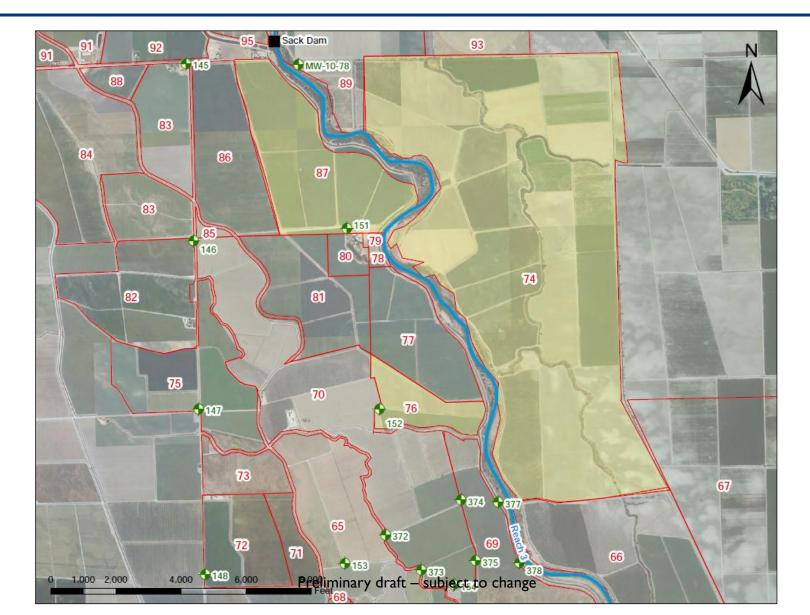

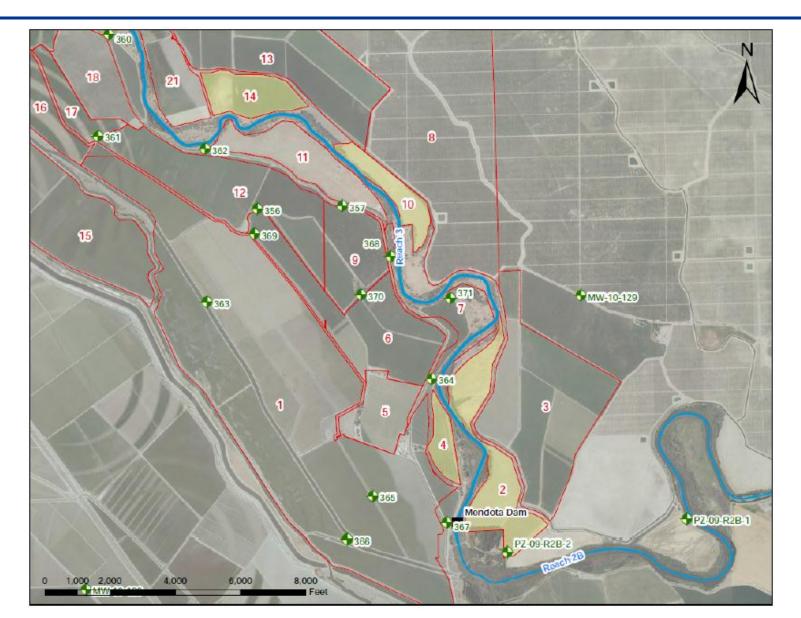

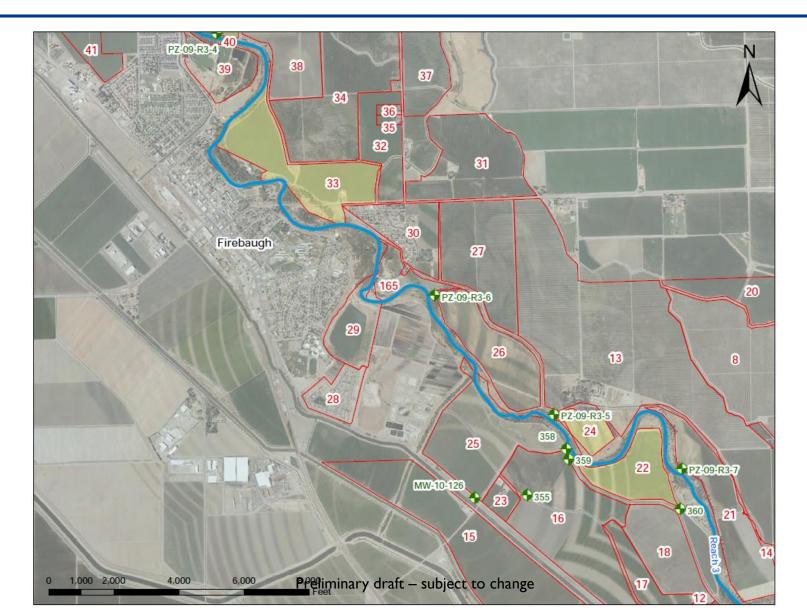

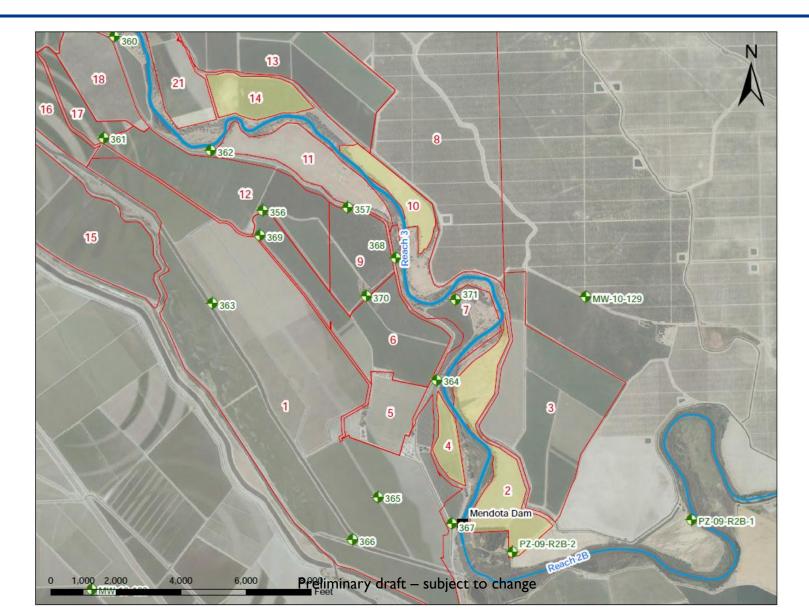

- Implement projects beginning with locations most constraining on flow, whichever landowners are willing of the first tier
- Six site visits since March I
- Nine Seepage Projects Initiated
- Implementation of first three would allow flows below Sack Dam up to approximately ~500 cfs

- Parcel Group 167
 - Reach 4B adjacent to the Eastside Bypass
 - Site visit conducted on March 9
 - Working to stake additional monitoring locations
 - Preparing Methods TM

- Parcel Group 168
 - Reach 4B adjacent to the Eastside Bypass
 - Site visit conducted April 9
 - Working to stake additional monitoring locations
 - Preparing Methods TM

- Parcel Group 164
 - Reach 4A
 - Site visit conducted March 14
 - Hand augering completed
 - Additional well locations staked
 - Preparing Methods TM

- Parcel Group 87
 - Reach 3
 - Site Visit conducted March I
 - Waiting on TEP for additional monitoring
 - Preparing Methods TM

B&B Limited

- Parcel Group 74
 - Reach 3
 - Site visit to be scheduled soon

- Parcel Groups 14, 21, 24, 26
 - Reach 3
 - Site visit conducted on March 28
 - Will be working to stake additional monitoring locations
 - Preparing Methods TM

Harman

- Parcel Groups 101-103, 111, 112, 115, and 142
 - Reach 4A
 - Site visit conducted April 3
 - Will be working to stake additional monitoring locations
 - Preparing Methods TM

- Parcel Group 159
 - Reach 4A
 - Site visit to be scheduled soon
 - Additional monitoring locations staked, to be drilled first week of May
 - Working on records review

Willis

- Parcel Group 154
 - Reach 3
 - Site visit scheduled for May 3
 - Working on records review

Patti Ransdell

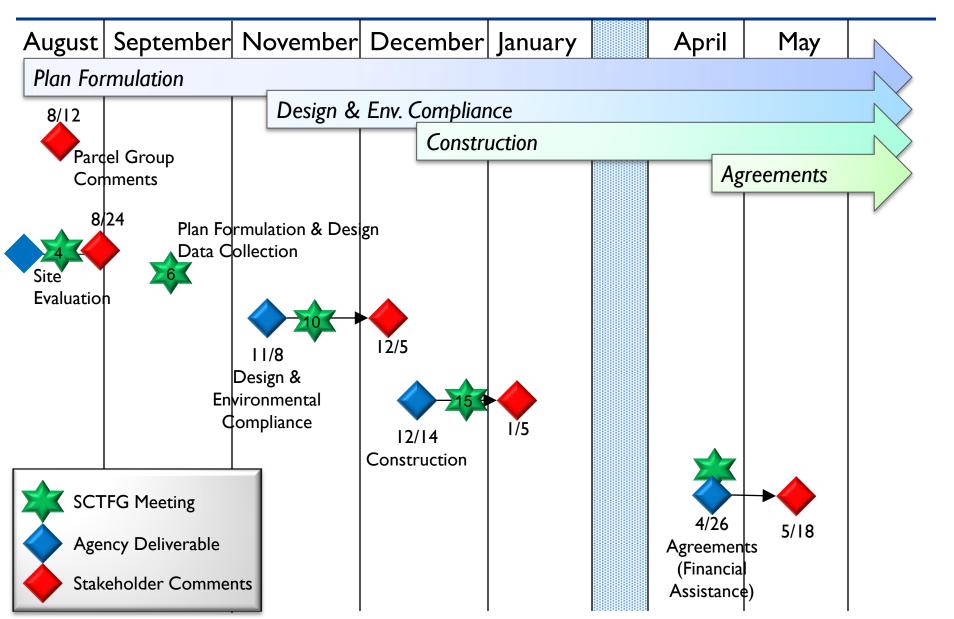

NEXT STEPS AND FOLLOW-THROUGH

- Full SPH to be posted to restoresjr.net by COB, April 27
- Feedback from Landowners on entire SPH (including Agreements section)
 - Due May 18
- Next Meeting Date
 TBD

Milestones for Handbook Preparation

Action Items and Review

- Update Action Items
 - Revised Actions
 - New Actions

Parking Lot Topics

- Impacts to Firebaugh
- California State Lands Commission findings
- Full range of alternatives including:
 - All tile/interceptor scenario
 - All easement scenario
- Identify potential willing sellers for acquisitions projects.
