Field Activity Advisory
Mitigation Lands Trust Berm Repair
May 2019

The San Joaquin River Restoration Program (SJRRP) will repair an earthen levee on government-owned land along the Mendota Pool’s northern side. The Mitigation Lands Trust (MLT) Berm Repair will construct an access road and super-sack cofferdam to minimize seepage and allow for dewatering of the MLT property (Figure 1). Additional construction activities may include building a working pad to allow heavy equipment to gain access to seepage areas and localized trenching and culvert installation to aid in field drainage. Reclamation acquired the MLT property in 2018 as part of the Reach 2B and Mendota Pool Bypass Project. See Figure 2 and Figure 3 for additional project details.

Who:  TSI Engineering Inc.

What:  Super sack cofferdam and access road construction and dewatering.

When:  May 2 through May 17

Where:  Construction will take place on the former MLT Property in Madera County. Access to the construction site will occur on public roads.

Questions about SJRRP field activities on public and private land should be directed to the SJRRP Landowner Coordinator or Public Affairs Specialist below.
