SAN JOAQUIN RIVER RESTORATION PROGRAM

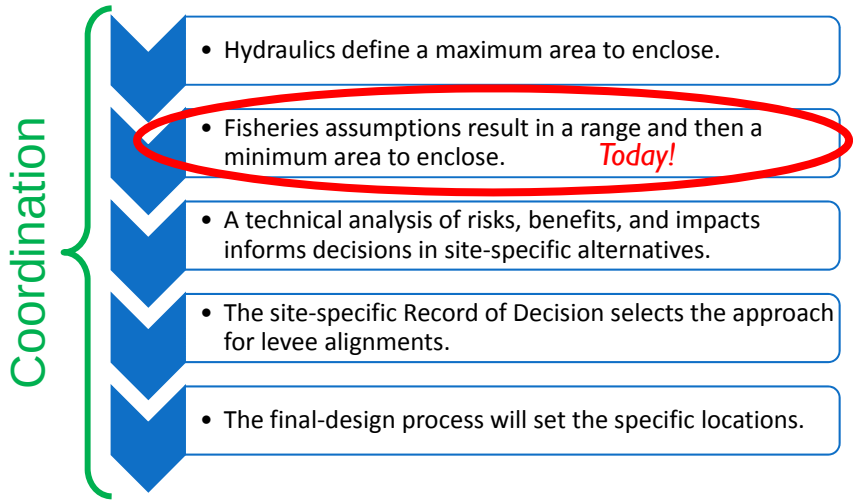
Floodplain Introduction

Restoration Goal Technical Feedback Meeting
July 19, 2012

Preliminary draft – subject to change

Context for Today

2B & 4B Levee Alignment Process



Minimum Bookend Phase Estimated Dates

- July 19, 2012: Coordination Meeting
- August 24, 2012: Public Draft Report
- September 7, 2012: Formal Comments Due
- September 21, 2012: Initial Response to Comments
- October 5, 2012: Resolution

Site-Specific Phase
Estimated Dates

- Risk, benefit, and impact analysis through site specific projects
- 2013 Spring – Site-Specific Public Draft EIS/R
- 2013 Summer – Site-Specific Final and ROD
- 2013 on – Final Design

Goals for Today

1. Establish the Analytical Tools and the Parameters to Test
2. Develop Scenarios for the Parameters in the Analytical Tools
3. Discuss the Process for Technical Discussions on Minimum Floodplain Analysis
4. Continue Working toward a Culture of Constructive Collaboration between Agencies and Stakeholders.

Ground Rules and Enforcement

Rule	Self-Enforcement
Make Specific Recommendations	Boomerang: Presenters may ask commenters how to accomplish suggestions.
Bring Resources	Contribution: Commenters volunteer an action item to accompany suggestions
Positive comments	Rephrase: Round-robin to identify common unhelpful suggestions. Attendees to prompt commenters to rephrase negative comments in order to keep the conversation constructive.
Exceptions	We need to be able to have tough conversations; Commenters self-identify comments that do not meet ground rules.

Provide feedback if the ground rules are not working so we can change.
